## **Bunker Charge Notice for Transpacific Trade**

In order to comply with the International Maritime Organization(IMO) 2020 resolution on sulfur limitation, WAN HAI LINES LTD. is going to implement the scheduled fuel tank cleansing and re-fueling with low sulfur fuel ( $\leq 0.5\%$ ) as replacement of CST 380 starting from November, 2019.

Hence the bunker charge for the 4<sup>th</sup> quarter 2019 will be divided into below two stages:

1. For October 1<sup>st</sup>, 2019 to October 31<sup>st</sup>, 2019, the bunker charge will be calculated by taking the average of the daily selling rate of “CST 380” and Marine gasoil(MGO) in Los Angeles for the 13-week period ending 30 days prior to October 1st, 2019.
2. For November 1<sup>st</sup>, 2019 to December 31<sup>st</sup>, 2019, the bunker charge will be calculated by taking the average of the daily selling rate of Marine fuel price (Low Sulfur Fuel  $\leq 0.5\%$ ) and Marine gasoil(MGO) in Los Angeles for the 13-week period ending 30 days prior to October 1st, 2019.

We take the weighted average of the above mentioned two types of fuel in each section respectively to apply to below bunker charge table, which takes into account the average vessel fuel consumption per FEU and other trade factors.

**From October 01 to October 31, 2019**, unless otherwise specifically indicated in the rate item or service contract, the following “tariff Bunker Charge” will be assessed on all base freight rates listed in the tariff or service contract.
